

Good day

I would like to add my personal experience of the use of cash. I use cash to budget my expenses throughout the month. I am on a tight budget and Groceries are so expensive the only way I can budget is by taking out cash and setting out an allowance each week I don't know how I would manage otherwise. Using my card is handy but the downfall is tap and go you have no idea how much yr spending until you check your bank statement and realise you have overspent.

I don't know why things have to change it seems to work fine if people want to use cash or card the option is available. After spending a weekend away a while ago in London I don't know how we would have managed without cash. On two separate occasions within two days and different locations the internet went down and were unable to use cards.

One business I have come across a coffee shop only uses card and won't accept cash and as cash is still legal tender I don't shop there.

I hope this is useful for your review.

Thank you
