

26th May 2008,

Dear Sir,

I do not think we need
Bull Semen brought into Jersey C.I.

Before I got married, I work
for Mr. Bill Perchard at "la Chasse" farm
St. Martins. He had prized bulls and
cows, which he took to the shows. He
wonne many prized and told me that
the Jersey cow should remain as it is.

After getting married I worked
at Trinity Manor with the cows with
Frank Amy.

I took to cows to the farm
near Trinity Church, to be ~~serv~~ served
with the bulls.

2.

I do not agree with bringing
bull Semen into our Island

The Herd book has been
going for 200 years.

The Jersey cow and bull should
stay as it is now and nothing should
change.

I sincerely hope that the
"States" don't agree to bring
bull Semen in.

Yours Faithfully
Robin Guy Stewenson
