For the attention of the
The Environment Scrutiny Panel

I find it unbelievable that the Minister of Transport and Technical Services can even consider altering our speed limit in the green lanes . Is he not aware that there are drivers who exceed the speed limit now so if he puts up the limit from 15mph to 20 mph they will do 25 to 30 .

For instance I have noticed when walking down La Rue du Croquet , St Aubin with it's very narrow pavements, cars come down there far too fast , it is a 15mph road (I hope he is not going to change that to 20mph.)

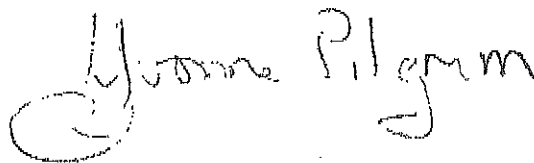

I am in agreement with any change from 40 to 30 mph if it is in a built up area .

I drive at 40mph when it is allowed e.g. Victoria avenue, but am constantly overtaken by cars and vans and motorbikes .

I am afraid this ridiculous idea has come about due to the fact that some people have powerful cars . .That is their choice but they must stick to the limits .

Most of the roads in Jersey are not suitable for higher speeds .

Yours Faithfully

Yvonne Pilgrim
