COMMENTS

This amendment is not supported by the Council of Ministers.

The Connétable is arguing for equitable funding, but unfortunately he has not explained what he means by the term. The Council believes that the Connétable should take the lead and work with the Comité des Connétables and the Minister for Transport and Technical Services to bring a Report and Proposition to the States for debate outlining the range of services to be considered, the costs currently being incurred by the Parish of St. Helier for those services, the options for delivering them in a manner that will achieve best value for the Island community and the implications for the States and other Parishes.
