

The case of recycling has concerned me for some time.

In some parishes there is kerbside recycling, which obviously encourages more to take place. In others there is none, and people are lazy when it comes to taking their recycling to the bins. If there was kerbside recycling throughout the Island, then far more would take place, and it could be compulsory.

Regarding the recycling of plastics, in the Island there is only an opportunity to recycle plastic bottles. When will there be facilities to recycle other plastics?

I hope the above helps.

Helen C. Sole (Mrs)
