

## Education and Home Affairs Scrutiny Panel - Early Years Review.

### Response from Samares School:

- Would children be coming for 20 hours/week but only part time to free the space for another child in that week?
- How long do you envisage the Nursery day to be?
- What happens to the children who need more than 20 hours due to parents working or children being under care of children's service - will they still have full time places?
- What would constitute a full time place?
- **Logistics** With regards to States and Private nurseries working together - what would be the cost implications as all States Nurseries have a teacher running them - would this be required in private nurseries?
- **Sustainability** Will there be sufficient funding to continue this into the future - especially if it is planned that children of younger than 3-4yrs are to be included?
- How would equity of access be assured?
