

The whole site selection was wrong. They knew which site they wanted before the site selection process! I think Warwick Farm would have been a much better location! States owned and a large fairly flat site with good access!!

The cost is extortionate! More people will be leaving the island when taxes go up to pay for it!

If we have severe cold weather how will access be made?

The whole process is being pushed through way too fast!

Compulsory purchasing of properties before its even passed!

The building is not in keeping with the surroundings!

We don't need world class facilities, unless we will be using most of the facilities for paying private patients!

Where are all the staff coming from to run the hospital, and how many will stay working there with the poor management and bullying within the current hospital?
