Dear Ms Thorne,

Please find below our response to your request for a submission to support the Scrutiny Review – New Healthcare Facilities Programme.

Following the most recent change in the proposed new hospital solution we have had no direct communication regarding the new programme. We are aware of the public forums including one such event specifically for Kensington Place.

Our concerns regarding our fuel forecourt and retail store in Kensington Place will centre around access during the build phase. Obviously being a fuel forecourt requires that vehicular access to Kensington Place be unaffected and maintained throughout the construction. We have not been consulted with or made aware of the plans concerning this.

As and when these detailed plans and proposals are available we will be happy to engage with the consultation and also able to provide a fuller response.

Please do not hesitate to contact me if you require any further information.

Yours Sincerely

M J Rutter
