

Health and Social Security Scrutiny Panel

Redesign of the Health and Social Services Governance Model

Written Submission

NSPCC – 29/08/2017

This has recently been passed to me to respond and I have read the new governance model document and welcome the changes to continuously improve partnership and service user voices in the delivery of services. I would hope there will be a specific focus on children and young peoples' needs. We have had a positive experience of partnership working with our colleagues in States of Jersey and look forward to these continuing relationships.
