

To whom it may concern

We would appreciate if all commercial units to accept cash and have this option as payment Should be illegal not to have this option if you trade. Cash should remain not just for elderly people but also children. You have more chances to be scammed using online system rather than cash. I don't think we will ever have such perfect cybersecurity and even so, to force someone to use any technology without their will is should be against human rights. Cash should remain in use. Just because majority have a smart phone doesn't mean everyone should have one.

Plus is inappropriate to place the King on a bank card. 😊

Many thanks,

Ramona M
