

trudeau, the canadian "politician" I'm sure you're all aware. He illegally stopped plastic for all those exercising democracy with a different opinion than his orders. People could have died in cold over that!

Purely a bankers tax on every transaction, changeable at their will.

Funds stopped by "error" blame computer, tax error, false allegations, I've not yet seen these cover costs, let alone applicable fines!

I'm sure you ain't bothered yet a "card swipe" for a busker! It takes the very soul from the art, not really sure if you can comprehend that?

I had my card charged three times, fortunately the cafe owner saw & we could sort, saving me an afternoon at the bank, for which I would not be compensated!

As, I believe, please correct if necessary, you "politicians" all pledge allegiance to the "crown" please inform general public of this also our options as/should "crown" & "WEF" push this. One option is our independence, I know this frightens you all yet not me & it is an option. In the face of "democracy" & yourselves being our servants, outlining our independence is a duty & one you have now been charged to do, I expect to see soon as it should already be ready.

Under duress Without Prejudice,

Gary F.
