

Dear Scrutiny Members

Not wishing to de-cry the great job the scrutiny panel are doing

But feel we are missing the point and not addressing the real problem ie. the hospital is in the wrong place, the cost is absurd and the present government are incapable and incompetent with no accountability.

We have a democracy in name only, we are really a plutocracy which lets face it has never been successful in the past.

The whole sorry catalogue of gross dereliction to duty of this and previous governments and their blunders is far too large to list here and unless these massive shortcomings are attended to we are akin to just putting sticky plasters on terminal arterial bleeds.

Continuing along this foolish course and indebting us and our future generations is nonsensical folly and utter madness.

As like with global warming, unless we change NOW we, the island, the human race and most living creatures on this wonderful planet, our only home, are heading for an unmitigated disaster!

Whilst we appreciate we are probably whistling in the wind for real change and action, but this is our take on this subject.
