Tim oldham

In response to the letters sent out 22nd may 2007 (early years education and childcare)  
As a family day carer (childminder) it really doesn't involve me as children generally leave my care at three years of age.

It is my only source of income so if that was the case would i be payed by the states or government i don't really understand?

But as a parent who has had to pay for childcare in the past and a tax payer i really think these funds would be better spent else where if you choose to have children you have to weigh up the price of childcare nurserys and if you chose private education schooling.

All the money spent on needless flying banana's and luminated police signs just take the biscuit.

A working mother of three who had no support for childcare.
