

Where do I start! None of what is proposed makes any sense at all.

So many people are unhappy about the cost and where the proposed hospital is going. The ridiculous amount of disruption involved such as the Westmount Road and buying people's homes, let alone the crazy cost. It's like "the island's gone mad." It's senseless.

Why has it even got this far? No one can possibly think this is the best place. There has to be someone who can stop this now. Fort regent? Why not there? Many people will give you other suitable places.

I actually can't describe this as anything but delusional.
