

Everything about this project feels wrong:

The location

Access route

Cost

Have we identified what we want from our hospital?

Relocation of clinics to Les Quennevais, in the midst of a residential area, means increased traffic and parking requirements. This is by no means a central location, which we are advised is required for the hospital. We are being asked to reduce the use of cars, but this is not going to help.

Changes are being made to the Overdale site and properties are being bought up in advance of a successful planning application. Is this acceptable or appropriate?

The project team appear to be forging ahead with no regard for the concerns raised by the public.

Please, please stop now and reconsider. More wrongs will not make a right.
