

This government is set upon bankrupting the Island. Why are we spending money when Planning has to approve the project? We compulsorily bought property for when the hospital was to be built and extended but failed to get planning permission. We are spending money on the access road and worrying people/businesses in the process regarding Overdale.

Borrowing money doesn't make sense. Why does it cost so much? Why don't we get backing from the medical profession to specialize in a subject and capitalize on that? So many questions and no answers forthcoming.

The whole project is flawed. There is nothing to recommend it. Put it before Planning and go from there.

Same goes for Fort Regent. Movement before sanction. More money spent on reallocation of clubs but why? Hotels are not viable but let's put one in the most inaccessible place.

This government has to be replaced at the next election. Total rubbish, don't listen to the public, set upon spending money just because it is sitting there. If it was their own cash I bet nothing would be done without due consideration.
