Corporate Services Scrutiny Panel

Dear Sir/madam, I believe from Jersey Post that you are asking for views from the Public concerning the "Importation of Bull Semen into the Island of Jersey."

I firmly believe that it is in Jersey's interest to keep our cows & bulls as a pure breed & not to interfere in this purity in any way. Our cows are heard of, wanted & loved all over the world, the export of our semen is very valuable to us.

Why if our cattle are in such demand all over the world, do certain people want to destroy this purity. One other semen is invited over here the people abroad will no longer trust that our semen is pure.

Visitors that we have, when taken for a ride in the countryside want us to stop for them to take photographs of our beautiful cows in the fields. They say that in Guernsey it is not the same, they have fields of black cows. This is the only place in the world where the cattle is pure, it is very precious & should be kept that way.

Yours Faithfully

Dr. Barnsley.

MRS. M. BARNSELEY.

P.S. I am not connected with anyone in the farming industry, it is just my common sense.
