COMPOSTING FACILITIES (P.258/2005): COMMENTS

Presented to the States on 19th December 2005
by the Comité des Connétables

STATES GREFFE

COMMENTS

For a number of years all compostable material has been stored on one site in the Island and the Connétables consider it would be a retrograde step to identify separate sites within each Parish. The focus should instead be on reaching a decision as to the future arrangements for waste disposal including composting and on identifying an acceptable single site for material suitable for composting.
