The Environment Scrutiny Panel,
Scrutiny Office

Marie House

St. Helier

Jersey, JE11 0DD

Dear Sir or Madam,

Would it not be possible to use the "Ash Waste", mixed with Crushed Granite, Cement or old crushed Bricks from demolished property to make more bricks or blocks for buildings, walls, etc? Then we could make them in Jersey instead of importing them from wherever, and give jobs to the young. After all, it will be "the young", who will appreciate it later.

By the way, I do not work in the building trade, but with fabrics, so probably do not know what I'm talking about.

Yours Sincerely,

Barbara Ballantine X
