

I just can't believe this fiasco is still continuing. Why put it on a hill with no access right next to the crematorium?! St saviour hospital is situated in a fabulous site, which has space to have beautiful gardens for convalescing. A shuttle could have been implemented for those who don't drive, and parking for others.

The money that has been spent so far is outrageous and what it's going to cost!! The people who are planning this should take a step back and think how they would spend their own money!

We need a new hospital that is fit for purpose and for our island, and not the world. Somewhere can get good staff to work there.

The new Les Quennevais school and strive sports centre at the rugby club managed to get planned and built quickly, why not our hospital? Far too many people wanting to get the pensions out of it!

Please, please can someone think with a common sense hat on!
