Mrs P Drelaud

25 AUG 2003

JR

Dear Sir,

I am writing to say how shocked I am at the very thought of Jersey Telecom being privatised, they have served the Island very well, over many, many years. It is not perfect, but what is in this day and age.

We hear £200 million is what they have been valued at, exactly what are the States going to do with this vast amount of money squander it away like they are first class at.

If I have my facts right does, this not stem from the fact that

(2)

Jersey Telecom have the monopoly in the Island, so what, this is an Island not the United Kingdom.

So far there is only one other that has shown there hand, and surprise, surprise, who should it be but Cable & Wireless.

I don't think for one minute in writing to you to express my views on this matter will make any difference, as no doubt like everything in this Island, it is already cut & dry.

Can nobody see, what Privatisation has done in the U.K. Just where are getting these grand ideas from, and where does it end.

637  
I didn't vote people into  
the States, to see this Island  
of the highest bidder

Yours Sincerely  
Yrs P Drelaud
