15TH June 2007

Dear Sirs,

Ref: What do you think?

Correct Balance :

Government should have information of all residents and immigrants , numbers and addresses in island and information on where people are housed wether or not they are employed or on social services.

Population Register :

If used to a full and maximum account of all residents and immigrants would assist in keeping check on exact population and make easier access for scale of availability on water , electricity , schools , cars road use , housing and work ect , a capping of population could then be fixed without encroaching on peoples rights.

Yours sincerely

David Rault
