

Please Scrutiny, you are Jersey's last hope to stop Lyndon Farnham's "money is no object", ever expanding, and frivolous plan for Jersey's "spectacular" new hospital aimed specifically at attracting rich private patients, (non-resident no doubt preferred!!!) with us ordinary islanders presumably being accepted for treatment out of obligation rather than by design.

This island desperately needs a new hospital, on a site easily accessible to all, by whatever means of transport is required by them, and offering an excellent standard of medical, surgical and nursing care. That is all we need!!

Senator Farnham is wasting millions and millions of pounds on a monthly basis and yet not a single set of plans have been prepared/submitted to Planning, never mind even been seen/reviewed by our other States Members.

He is an out of control, one-man train hurtling every islander towards higher taxes, and the island itself towards bankruptcy.
