Subject: FW: States Assembly, Scrutiny Office: Digital Skills Review

I have some observations to make:

- Haute Vallee School supports the move to improve IT in Education.
- The timescale for implementation of school business plans was initially unrealistic but this has now been extended - which is acceptable.
- Some support has been offered to develop the strategy. We are in the initial stages of compiling our business plan.
- Far more training is required for all staff.

Many thanks

Regards
