

Is Cash still needed?

We need to look at the reverse psychology of why this survey is being tabled and without the bigger picture understanding, all people, hard working people and their sons and daughters and future generations will be affected.

This is being discussed so that a socialist vehicle can be introduced called Central Bank Digital Currency which will be linked to a Digital ID and a CSRQ social management / social credit system with four class systems:

- Common Class
- Sovereign Class
- Restricted Class
- Quarantined Class

The finance system has over traded since the removal of gold backed currency in the 1970s. to keep on quantitative easing, creating money by adding zeros and ones to balances can only have over time; a negative effect on the financial system, leaving huge debt and the need to create a new system.

Klaus Schwab of the World Economic Forum and his Young Global Leaders have been drooling over this new form of corporate communism and its starts by derogating your privacy, rights and freedoms.

Young Global Leaders of the World Economic Forum wish for a Digital ID and your bank details to control you, enslave you and turn off services as and when they feel.

Canadian truckers who protested only a couple of seasons ago had their bank accounts frozen and you only need to look toward China for the totalitarian social credit system, which is soon to be in place in Australia if good men do nothing.

And don't forget that the governments who all signed the agreement of nett zero in 2030 don't want you to eat any meat; or have more than 3 items of clothing a year; let alone travel or have a four stroke engine.

Don't believe me – check out absolute zero and C40 cities – all ratified by the Mayor of London.

To conclude, we must maintain the right to privacy, exchanging on paper currency but more importantly if you want to use cash, a credit card or debit card; its yours to do with what you want and spend it how you want. As long as you cause no harm, loss fraud or breach of the peace then what you do is of nobody's business.

The Government must answer and provide assurances that there will not be a shift towards a CBDC system with a social credit system hiding behind the curtain.

We have freedom of choice, rights that cannot be derogated. We have Human Rights Laws, all the basis of a just and fair society but remember these as everything else is by

consent, do not give that power away for when it is gone it is gone for us and our future generations, stuck in a corporate control grid that makes you feel guilty for breathing and owning a chicken.

So the question is this: have the people been given FULL DISCLOSURE OF WHAT THIS CASHLESS SOCIETY IS REALLY A PART OF?

Those in governance are under oath and that oath is to uphold the law, we didn't ask for the WEF to be our daddy and tell us what to do and that is the way it should stay.

Full disclosure and a duty of care to the people should be first on the agenda.

No thanks Mr. Schwab; we will own anything we want and be happy!
