

Dear Sam

Do hope you are well.

What do the Government want to put on this register?

In my opinion I feel that information could include:

Name

Address

Date of birth

Place of birth

Date of arrival in Jersey (if not born here)

Names + ages of children

This information is essentially that necessary to obtain a passport.

I feel that medical records should not be held centrally as this would contravene an individual's right to privacy.

With best wishes

Andy Howell
