

The cost is astronomical when compared to other new builds in Europe which are half the cost for more. There needs to be more transparency on the costs and how they even expect to staff the building when complete.

Similarly the wasted money moving to Les Quennevais has to be questioned - is it necessary? does the whole of the overdale site have to be vacated during the initial part of the build - what happened to the idea of west away court - also now empty - which was earmarked for clinics - more plans abandoned.

So much wasted money, time and an insult to medical and nursing staff who's views have been ignored repeatedly and continue to struggle with the current facility.
