Dear Sir/Madam,

Re Sustainable Population

As far as I can see - no one has yet mentioned offsprings of immigrants, personally I feel that the powers that be are living in cloud cuckoo land thinking that our island can sustain 90,000 people, we cannot, sad to say, young women & young men will without doubt have children purposely in order to get a foot hold on living accommodation, cynical I know, but that is what is already happening.

2.

Then we come to The question of services, can we really sustaine more sewage leaving our shores, can we really heal people in our own Hospital, just where do you think you are going to educate the children of those unions?

I honestly despise of so called educated people (like the first Minister!) saying he thinks we could go to 90,000, why should he care, he will be dead by the time we all realize what a monumental mistake has been made. Think of the words of ENOCH POWELL before we too get into the same sorry, awful

3.
State that the U.K. is now in.
I would say in 20-30 years the
government in the U.K. will be
muslim, so do ~~y~~ we really want
the same horrible outlook here?
do you really want to lose Jersey,
because that's just what you are
doing, & I think it's criminal,
so, NO we do not want or need
Further population increase now.

Sadly yours

Barbara Clarke (Mrs)
