

De La Salle College:

13th December 2013

'De La Salle College, although partly funded by The States of Jersey, does not have access to funds provided for specific initiative's such as "Vision for IT in Education" and "Developing a Digital Jersey", which will be reviewed by the Digital Skills Scrutiny Sub-panel. These two reviews are therefore, ring fenced initiatives within the responsibility of the States owned schools both fully and part funded.

The only part of the strategy that would apply to De La Salle College would be around the changes to the computing curriculum and examination that are occurring in England. We have decided to watch these developments with interest.'

Mr J Turner (Head Teacher)
