

Dear Sirs

My daughter from Year 5 at Rouge Bouillon School has just done a class project on the States Assembly & has recently visited & sat in The States Chamber (She was in Senator Le Marquand's seat)
They actually had a debate in the States about 'the amount of water that people use' and concluded that metering is essential.

Makes me wonder if there is any point in carrying out a review. Surely contacting the Education Dept. would be a first step in the process.

Mr Vincent
