

I would like to register our concerns about the plans for the new hospital we feel very strongly that Scrutiny or States members should stop this development whatever the cost up to now, these costs should be written off, as the final figure is inevitably going to be more than we have been led to believe. We have seen no plans, no costs, just guestimates! apparently it hasn't gone out to tender no proper costings so how can they have reached a final figure to borrow. Please have the courage to stop this senseless development now! Yes we need a new hospital but not on this site. Ask the public how they feel about this. Please before it's too late.
