

My wife and I use cash only. We get our cash from any ATM that is working. We buy everything we need with cash as we know how much we are spending as we have a limit each week. When we get our Bank statements it takes only a few minutes to check what has gone out. If we bought every thing on card we would have about four pages to check through to make sure it adds up right. why would any one pay for a loaf of bread or a litre of milk on card or by phone. I do not have a phone to allow me to do payments. I still have an old Nokia phone. Our Grand children love receiving Birthday money, Christmas money, holiday money and pocket money in cash. It is sometimes cheaper to use cash. IE, taxies take away food deliveries. I even pay my income tax with cash which they do not like as they have to count it by hand. Maybe some people do not know how to count with out a calculator or their phone. Businesses should not be allowed refuse cash and if they do I walk away. Supermarkets are slowly moving towards card only as they will have to employ less people. I told one supermarket worker that if they went card only that I would go there every week and fill up a large trolley with food and items and go through the payment system and at the end say sorry I only have CASH. PLEASE KEEP CASH FOR US OLDER PEOPLE.

Thanks
