Developing

Dear Scrutiny panel,

I am writing regarding the advert I have just heard on the radio I am a young islander and I don't believe that you need to develop on every price of land that comes up to grabs. But I do understand that you still need to be able to accommodate all of the islanders but that does not mean that you need to ensure that you buy every price of land that becomes available because as your saying goes Jersey Put children first well you may want to think that we could benefit with a couple more green spaces not just parks and skate parks but places which we could be surrounded by a calm environment and it has been proven that greenery with nature helps with our mental health and gives not just young islanders but islanders of all ages the ability to have a more positive mental health.

Thank you for taking the time to read this email and I hope that you take it under consideration.

Kind regards

Sienna Springett Year 9 GCSE student.
