## COMMENTS

The Minister for Treasury and Resources is supportive of the more prudent approach put forward by Senator Shenton in his amendment. This requires further work on costs and the source of funding to be carried out, and a final proposal to be included in the Annual Business Plan 2012 if that detailed proposal is approved by the States. The Minister believes that this amendment, if approved, would permit a more well-informed debate on the main proposition. This comment should not be taken as an indication of the Minister's support, or otherwise, of such an amended proposition, as it is still likely to represent a substantial cost at a time when funding is scarce.
