

**Name:** Darryl Morris

**To whom it may concern.**

**I feel compelled to right this submission.**

**Jersey is an island with a long long history of fishing and now more then ever is the time to protect the islands future.**

**I'm not a fisherman but I have worked In and around the industry for over 20 years as a marine engineer. I've supplied new engines/parts and maintained numerous boats In the fleet over the years which I'm proud to have done.**

**All of these guys work extremely hard and supply both the island and continent with fresh fish to make a living. If the local government do not stand up for the current and future fisherman of the island then not only are you effecting there lively hoods/futures but also dozens of other local businesses who work closely with the local boats my company included.**

**Government of Jersey. Now is your time to protect the islands waters and future for all our younger generations of fisherman.**

**Please do the right think and support your fellow islanders!!!**

**Kind regards**

**Darryl Morris**
