

~~Mr. P. Mott~~  
~~Westmount Rd.~~

I do not agree to Oasdale as the best site for a new hospital. I have many fears but I mention a few. I do not agree to the slice off Peoples Park or the demolition of the Bowls Club, the removal of the cliff face to widen the road, or the devastation to peoples homes. There are other sites but it seems the States refuse to use them. Living in Westmt Rd this will effect me as work will be digging for many yers. However I was not kept informed of these plans ~~and~~ accept for a small piece of paper with very little information informing me work would start in January. What interest me is why are they persevering with a site turned down by planning as not suitable earlier

Only a few yers ago Oasdale was extended, plus work on other depotments, but nothing done to provide new sheds at the back, parking is a problem. There are times when parking on the road is the only option.

Westmt Rd is a bus route, used by visitors to hospital patients, shopping and funerals. Busy with cars going to business in town, all this traffic will be pushed onto an already busy Queens Rd. This plan is far to expensive when we had been offered a build for a third of the price this was rejected! it would also be completed in two yers, not 6 or 10 yers, which will cause so much chaos. Lets not forget Westmt Rd is of Historical interest, I hope we can rely on Planning to support the jersey people.

With respect

Mr P Mott.
