

I wish to make it known that, along with many others, this whole Overdale thing is heading towards the greatest catastrophic decision even made here. It must be the worst Plan ever. It must be impossible for proper professionals to even look at such a badly presented project. Nobody could sign it off. If the Plans go through Planning it will be an utter disgrace. The escalating costs are mind boggling, and my grandchildren will pay the price.

It is not fit for the purpose of Jersey people.

The site is completely and utterly wrong. That the road widening up Westmount is part of the project is enough to say this cannot be worthwhile. It is a mess. An utter mess.

The project is way above what Jersey people need.

There are so many aspects wrong with it that I have not time nor energy to list them.

Just scrap the whole thing and start again. If Government have signed contracts with penalty clauses then they should be held accountable. It will be a heavy burden of all of us, but particularly my children and grandchildren and great grandchildren.

Stop this racket NOW!
