

It is essential that cash payments are accepted in Jersey. Everyone realises that not everyone has a computer or smart phone giving them the availability to make payments, either large or small. Also, technology has a very annoying and unpleasant habit of breaking down and it is sometimes a considerable time before it is back up and working leaving people with no money to pay for food or any other necessities. Furthermore in the case of wishing to give a young child a small amount of cash to pay for a treat from the shop there are very few people who would wish to give the child a credit/debit card which could easily be lost or scammed.
