**We need to protect our fish stocks, for future generations of Jersey fisherman. The main point being the recognition of Jerseys Territorial waters, as 6 mile from shore, and including all the outer reefs. French fisherman have had use of our waters for long enough, We can't be held to ransom with their threats. We need a clean break, no French boats in our waters, is far easier to police than letting some in, and having to try and manage their catch.**
