Scrutiny Matters Feedback - Affordable housing

The continued selling of What was States houses and Andium only building flats. This is not good for our future families or the housing market as it's still not affordable for many. Stop letting over seas investors in as it increases the cost with no one living in the properties most of the year. Stop letting estates agents just stick any old price on a property, as that is how it currently seems. Build homes not tiny 1 bed flats.
