

**WRITTEN QUESTION TO THE MINISTER FOR PLANNING AND ENVIRONMENT
BY DEPUTY P.V.F. LE CLAIRE OF ST. HELIER
ANSWER TO BE TABLED ON MONDAY 20th JUNE 2011**

Question

Would the Minister provide details of how many applications for housing in the Green Zone have been approved since 2001, showing each year up to and including June 2011?

In which locations were these approvals given and for what type of development?

Which politicians took part and agreed to the approval of these sites and which were approved by officers and/or Panels and Sub-Committees?

Answer

Attached is a summary of applications that match the requested description including the application number, address, brief description of the development and the decision making body (Sub Committee, Officer Delegated decision etc.)

The database which has been searched to provide the information is such that there are some applications which have been listed that do not directly relate to the provision of residential accommodation. This is a limitation of the search process and the list should be digested in this context.

In respect of the politicians involved in making the respective decisions, this information is not held by the Planning Department in the planning application records but is recorded in the relevant minutes of the meeting. Unfortunately it would not be possible to cross reference the applications determined by a States Member body with the minutes in the timescale of responding to this question.

Applications for new dwellings granted permission from 01-January-2001 to 01-June-2011

2001

APPROVED
