

I have used cash all my life I never use a card I know exactly where I am with cash. I am very annoyed at places trying to force people to use cards, people should always have a choice. I have many friends that have been scammed with their use of cards. Cash is always reliable when the card machines break down which is happening much more often. It's also no one else's business what people spend their money on with a card people's privacy is totally invaded. It's becoming like Big Brother wants to know everyone's every move. Cash has been around all my life and I certainly wouldn't want to live in a world with a cashless society.
