**La Collette land – storage and distribution of solid fuel.
Question and answer.**

Senator John William Ellis asked Deputy Norman Stuart Le Brocq of St. Helier, President of the Island Development Committee, the following question –

“Will the President inform the House if it is the intention of the Committee to allocate an area of land in the La Collette land reclamation scheme to be used for the storage and distribution of solid fuels and, if so, what area will be made available and when?”

The President of the Island Development Committee replied as follows –

“The Committee has had two requests for space to store imported loose coal for packing and local distribution. One request is from a local company, and the other is from a Guernsey-based company. Each requires approximately 10–12,000 square feet. Both operators believe that they compete effectively with the Jersey Coal Distributors Limited in the supply of various domestic solid fuels, and fuel for the glasshouse industry.

There are approximately 200,000 square feet of land in the Island Development Committee’s administration at La Collette, and an additional 130,000 or thereabouts in the administration of the Harbours and Airport Committee which is available for non-harbour-related activities at La Collette. Of this area, approximately 85,000 square feet is currently held in reserve for the possible use of the Jersey Electricity Company in connexion with future requirements for the generation of electricity, and approximately 50,000 square feet will be required for vehicle and boat parking in relation to other developments in the vicinity. This leaves in round terms approximately 215,000 square feet of land available for industrial development.

Against this figure, the Committee has over recent years received requests for industrial sites totalling approximately 713 square feet, which excludes the requirements of companies that have applied for a site but, for various reasons are no longer interested, and takes no account of those companies that have not applied but that the Committee would wish to see relocated.

The House will appreciate, therefore, that the limited amount of land that is available at La Collette is already heavily oversubscribed, and the House will be aware that the Committee, as part of the Island Plan exercise, will be bringing forward proposals to release more land for industrial purposes. My Committee believes that it is imperative therefore to ensure that what land is available is sold or leased to those companies whose relocation will secure the greatest planning, economic or social gains to the community.

The Committee believes that there is sufficient land already available to serve the Island's present needs for coal storage and that the requests from the two companies are based solely on the principle of competition with existing distributors, which in itself is insufficient justification for releasing valuable industrial land. The only valid justification would either be a substantial increase in the demand for solid fuel, or if it were deemed to be in the Island's interest to increase reserves of coal held in Jersey.

On a specific level the Committee does not favour the storage of loose coal at La Collette. It simply does not make sense to place loose coal, whatever measures are adopted to prevent the spread of coal dust, in close proximity to the Abattoir, and, might I add, the private meat importers which the Committee hopes to be able to relocate at La Collette, in an area of high wind exposure. The Public Health and Agriculture and Fisheries Departments have both expressed concern in the past at the possibility of coal storage at La Collette, and would, I trust, be supported by the Committee they serve in opposing such proposals.

The situation, therefore, is that the availability of space at La Collette for the storage of coal is remote. The Committee, however, would treat any application for storage of coal elsewhere on the planning merits of the individual case."

Trustee Savings Bank of the Channel Islands.

The President of the Finance and Economics Committee made a Statement in the following terms –

"The Trustee Savings Bank of the Channel Islands is to be subject to a number of changes in the year ahead consequent upon United Kingdom legislation shortly to be presented to Parliament in Westminster and which is to enable the Trustee Savings Banks to complete the removal of the longstanding restrictions on their freedom of action compared with that of other banks. For the benefit of States Members the nature of these changes is set out as follows in the form of a statement prepared in consultation with the Bank.

1. The Trustee Savings Bank of the Channel Islands, formed as a result of the amalgamation of the Jersey and Guernsey Banks in 1975 – the Jersey Savings Bank having opened for business in 1835 – is greatly used by the residents of the Islands. In November of this year the total number of account holders was in excess of 60,000, the majority of whom were residents of the Islands, and the total deposit funds held by the Bank were £167 million.
2. At the present time the Trustee Savings Bank of the Channel Islands operates in accordance with the provisions of the Trustee Savings Banks Act 1981, as extended to the Channel Islands. There exists in the United Kingdom the Trustee Savings Bank Central Board, and the latter has the power to give directions to, and provide banking services and support for, each of the Trustee Savings Banks established under that Act.
3. Under the present arrangements, the Trustee Savings Bank of the Channel Islands is subject to supervision by the United Kingdom authorities. Article 3(2) of the Depositors and Investors (Prevention of Fraud) (Jersey) Law, 1967, as amended, provides for the exemption of the Trustee Savings Bank from the need to register as a deposit-taking institution, and the bank is therefore not presently subject to supervision by the insular authorities in accordance with the requirements of that Act.
4. What is now proposed is that the Trustee Savings Bank Group, embracing the Trustee Savings Bank in the United Kingdom, the Isle of Man and the Channel Islands, is to be reorganised under the overall control of a new top holding company (TSB Group plc.) which will be the parent body for all the Group's activities.

The banking, insurance and instalment credit activities of the Group will each have their own separate corporate structure under the parent body, and the banking structure will comprise separate wholly-owned subsidiaries covering –

(i) England and Wales;

(ii) Scotland;

(iii) Northern Ireland;

and a separate subsidiary (Trustee Savings Bank of the Channel Islands Limited) to cover the Channel Islands with 49 per cent of the equity being offered locally.

5. Depositors (whether resident or non-residents of the Channel Islands and staff of the Trustee Savings Bank of the Channel Islands will be given preferential rights to purchase shares in the Trustee Savings Bank of the Channel Islands Limited and any shares not so taken up will be offered to residents of the Channel Islands. Shares may be offered to non-depositors who are non-residents of the Channel Islands if it is agreed to be necessary in the light of conditions at the time.
6. Depositors and staff of the Trustee Savings Bank of the Channel Islands will also be entitled to subscribe for shares in the TSB Group Plc. They will rank after those entitled to priority rights to subscribe for this issue, but will be given preference over the public.
7. The price for the shares in the Channel Island subsidiary offered for sale or subscription will be agreed between the Trustee Savings Bank of the Channel Islands Limited and TSB Group Plc.'s financial advisers, with a view to attracting full subscription from depositors (residents and non-residents, staff and residents of the Channel Islands.
8. A majority of the Board of TSB of the Channel Islands Limited will be residents of the Channel Islands and non-residents of the United Kingdom, and the Chairman of the TSB of the Channel Islands Limited will be a Channel Islands resident and non-resident of the United Kingdom. The TSB Group

Plc. will recognise that TSB of the Channel Islands Limited should take into account local market conditions in managing its operations; at the same time TSB of the Channel Islands will recognise that it will be part of the TSB Group and should be operated as such.

9. For these changes to be put into effect United Kingdom legislation is first required to provide for the repeal of the current United Kingdom Trustee Savings Banks Act, 1981, and the transfer of assets to the proposed TSB holding company. This United Kingdom legislation will, as with previous legislation relating to the Trustee Savings Bank of the Channel Islands, extend to the Islands with appropriate adaptations and modifications. In tandem with these United Kingdom legislative changes, the Finance and Economics Committee would propose to remove the Trustee Savings Bank of the Channel Islands from the list of exempt institutions under Article 3(2) of the Depositors and Investors (Prevention of Fraud) (Jersey) Law, 1967, as amended, thereby providing for the bank to be subject to the supervision of the Committee and its officers in common with the other institutions presently registered under that Act. This will be accomplished by an Order of the Finance and Economics Committee, in accordance with the provisions of Article 3(3) of the Depositors and Investors Law, as amended.
10. The Board of Trustees of the Trustee Savings Bank of the Channel Islands have informed the Finance and Economics Committee that they believe it is in the best interests of depositors that the local bank should retain the present close relationship and support of the United Kingdom TSB Group as a whole, and the Committee shares this view. Under the proposed arrangements, the Trustee Savings Bank of the Channel Islands will continue to be able to look to the TSB Group for support, and the agreed construction of the Board of the local subsidiary company would suggest that the present satisfactory blending of the interests of the local bank with the interests of the TSB Group will be maintained in the future. In addition, the proposals represent a further step in the steady development over recent years in

the ability of the Trustee Savings Bank movement, including the TSB of the Channel Islands, to provide a fuller range of banking activities, which the many customers are able to enjoy.”

Supplementary and Additional votes of credit.

THE STATES considered an Act of the Finance and Economics Committee dated 28th November, 1984, presenting Acts of the undermentioned Committees and, acceding to the requests contained therein, granted to the said Committees Supplementary (S) and Additional (A) votes of credit out of the General Reserve as follows –
