Subject: Environmental review submission 26:2:15.pdf

Dear Tim,

I attach for information our submission to the Environmental Scrutiny Panel that we have just sent off. It has relevance to the CSSP submission in that it deals with the potentially environmental problems tied up with the development of the Esplanade Car Park site (SOJDC's IFC buildings) which we do not wish to be brushed aside in the rush to create the new offices. The next document 'What really happened at the EfW' (to follow) relates also as it describes a similar States driven soil excavation exercise that recently took place and whose example should not be repeated and which serve as a warning to everyone this time around.
