

To whom it may concern

I wish to register my anger at the audacity of the Home Affairs committee.

It is shocking to think these people can expect us to pay for this police force twice

It is my opinion that we have probably more police per population than anywhere in the western world.

Thankfully, they probably have less to do than anywhere else

So why does our police Chief act like he is policing New York

(Where they really do have things to do other than harassing motorists)

And why does he insist on importing extra police men (who must think it is the cushiest job in the world)
And expect us to pay for it.

There is absolutely no evidence of trouble at Jersey Live that needs this stupid and expensive overkill

James Mc Donald
