Re Importation of Semen.

I have been involved in the Dairy Industry all my life. For the last thirty years I have been convinced that we need to import the best bull semen available.

In 1958 the Island exported to U.S.A. and Canada, its best breeding bulls. We sold the best and kept the rest! The world's best breeding Jerseys trace back to these Island bulls. We now have a great opportunity.

Please act now by recommending to States Members that Jersey semen be imported. This will revive the industry, thus providing great opportunities for enterprising young farmers.

Sincerely,
Lewis J. Rondel
