

Assisted Dying Legislation

Dear Sirs,

I would like to ask you to support the passing of the Assisted Dying Law. Those who have been faced with a terminal illness face months or years of pain from treatment and from knowing that they face the agony of seeing their families despair. No one should be forced to continue to receive painful treatment and have no control over their fate. Assisted Dying gives a person the chance to die at a time and date of their choosing, when all else has failed. Letting people linger in agony is wrong and I believe this law should be passed, with strict guidelines to ensure all is performed within the law.

Thank you

Jeannine Hochet
