Subject: Online safety for children

Good evening

My child is *[age redacted]* and has been enrolled at *[school name redacted]* since *[date redacted]*. Her education has been very poor to say the least. She is classed as a vulnerable child due to her needs. Because she has been out of education for 8 months and now only receiving 8 hrs a week now due to staff shortage, she started to reach out online for friends as she has always had a very isolated education. I did email the ministers and child commissioner about this before my child became a victim of on exploitation and no one ever cared. What are they now going to do to stop thus happening to more vulnerable children that are being let down by education.
